

A325

Project #1: Give Me Strength

You are to build this song from elements given to match the reference mix. You should plan on 4-6 hours to complete this project.

- locate the audio files inside the A325 folder (A325 Project #1)
- import all of these in a session
- make each a separate track (or stereo track) with the track name matching the file name **EXACTLY!**
- The backup vocal tracks have multiple regions, in this case they are numbered the same, ie “23.VocDouble_01. **Put these on the same track.**

(if you drag from the workspace directly into the edit window pro tools will create and name the tracks for you)

- find the tempo of the guide and set session tempo to that
(there are no tempo changes and the tempo is a whole number, no decimal)
- edit and place the files to fit the arrangement of the reference track
- create a stereo mix that matches the guide track.

**very important!!!! do NOT rename the tracks,
they must remain the file name (including the number at the start!)**

*You will NOT need to time compress or expand any of the files. If you do so
YOU ARE WRONG!*

Have Fun!!!
